Geothermal Reservoir Engineering	
O'Sullivan, M. J., D. P. Bullivant, S. E. Follows, W. I. Mannington	Modelling of the Wairakei-Tauhara geothermal system
Sigurdsson, O., V. Stefansson	Use of TOUGH2 in studying reinjection strategies
Oldenburg, C. M., K. Pruess	Higher-order differencing for front propagation in geothermal systems
Suárez A., M.-S., F. Samaniego V.	FITH2—A set of FORTRAN interfaces to process TOUGH2 information, data and results
White, S. P., R. M. Young, W. M. Kissling	Using ITOUGH2 to improve geothermal reservoir models
Quijano, J. E.	Transmissivity distribution at the Ahuachapán-Chipilapa geothermal field in El Salvador
Bullivant, D. P., M. J. O'Sullivan	Graphics and TOUGH2
Osato, K., T. Sato, S. Yokomoto	The modeling study using TOUGH2 and the micro-gravity change in Yanaizu-Nishiyama geothermal field
Sato, T., K. Osato, S. P. White, J. Burnell, S. Yokomoto	Development of an integrated geothermal reservoir modeling system for the modeling study using TOUGH2
Bullivant, D. P., M. J. O'Sullivan	Inverse modeling of the Wairakei geothermal field
García-Estrada, G.	Thermal evolution of hydrothermal systems from a geologic perspective using TOUGH2, Los Azufres, Mich., Mexico
Kiryukhin, A. V., M. D. Lesnykh, A. Y. Polyakov, E. G. Kalacheva	TOUGH application to analysis of the pressure transient data of Verkhne-Mutnovsky site, Mutnovsky geothermal field, Kamchatka

Nuclear Waste Isolation	
Reeves, M., D. G. Fryar, W. H. Statham, M. K. Knowles	<u>Assessing seal performance and parameter sensitivity with a full-shaft model</u>
Javeri, V.	<u>Combined gas and nuclide transport in a two dimensional repository considering a variable rock convergence</u>
Senger, R., P. Marschall, C. Bühler	<u>Gas tracer transport in two-phase flow field: Numerical simulations and field experiments at the Grimsel test Site (GTS), Switzerland</u>
Wu, Y.-S., K. Pruess	<u>Several TOUGH2 modules developed for site characterization studies of Yucca Mountain</u>
Cohen, A. J. B., C. M. Oldenburg	<u>Effects of faulted stratigraphy on saturated zone flow beneath Yucca Mountain, Nevada</u>
Freeze, G., G. Ruskauff, T. Christian-Frear, S. W. Webb	<u>Modeling the effect of excavation-disturbed-zone porosity increase on groundwater inflow to an underground repository</u>
Jobmann, M.	<u>Modification and application of the TOUGH2 code for modeling of water flow through swelling unsaturated sealing constructions</u>
Gribi, P., M. Niemeyer, R. Senger, P. Zuidema	<u>Preliminary investigation of radionuclide release under two-phase conditions from a proposed L/ILW repository in Switzerland</u>
Birkholzer, J. T., Y. W. Tsang	<u>Numerical analysis of thermal-hydrological condition sin the Single Heater Test at Yucca Mountain</u>

Environmental Remediation	
Webb, S. W., S. Finsterle, K. Pruess, J. M. Phelan	Prediction of the TNT signature from buried UZO/landmines
Lupo, M. J., K. W. Brown	Distinguishing the contribution of multiple sources from a gasoline release
Hodges, R. A., R. W. Falta, S. Finsterle	Three-dimensional simulation of DNAPL transport at the Savannah River Site
Moridis, G. J., Y.-S. Wu, K. Pruess	EOS9nT: A TOUGH2 module for the simulation of flow and solute/colloid transport
Rossabi, J., R. W. Falta	The behavior of volatile organic contaminants in the vadose zone with respect to barometric pumping and the estimate of residual mass and mass removal using T2VOC
Nastev, M., R. Lefebvre, R. Therrien, P. J. Gélinas	Numerical modeling of landfill gas production and migration with a N₂-CO₂-CH₄-H₂O system and a production functions
Battistelli, A., C. Ferragina, A. Chericla, G. Matarrese, M. Pieroni	Simulation of the transport of aromatic amines in the unsaturated zone for the evaluation of an environmental remediation project
Kroopnick, P.	Numerical modeling of JP-8 remediation by steam injection into artificial fractures in a clay matrix
Lupo, M., J., G. J. Moridis, K. W. Brown	Predicting the fate of Trichloroethylene and its daughters in a heterogeneous environment
Schwind, P. J., E. C. Miller	T2VOC simulation and optimization of SVE system pulse pumping of vadose zone carbon tetrachloride contamination at the Idaho National Engineering and Environmental Laboratory
Falta, R. W., J. S. Gierke, G. L. Hein	Using T2VOC to model kinetic interphase mass transfer during air sparging

Vadose Zone Hydrology	
Webb, S. W.	Using TOUGH2 to model capillary barriers
Liou, T.-S., K. Pruess, Y. Rubin	Numerical simulation experiments on water seepage in unsaturated, heterogeneous fractures
James, A. L., C. M. Oldenburg, S. Finsterle	Analysis of uncertainty for 2-D fracture flow and seepage into an excavated drift
Doughty, C.	Numerical modeling of field tests in unsaturated fractured basalt at the Box Canyon Site
Ho, C. K., S. W. Webb	The effects of heterogeneities and wavy interfaces on capillary barrier performance
Ahlers, C. F., S. Finsterle, G. S. Bodvarsson	Characterization and prediction of subsurface pneumatic pressure variations at Yucca Mountain, Nevada

Mining Engineering	
Lefebvre, R., J. Smolensky, D. Hockley	Modeling of acid mine drainage physical processes in the Nordhalde of the Ronnenburg mining district, Germany
Xu, T., K. Pruess, G. Brimhall	Introducing reactive chemical transport to TOUGH2: Application to supergene copper enrichment
White, S. P., T. Xu, K. Pruess	Reactive chemical transport

Process Modeling Applications	
Finsterle, S., T. O. Sonnenborg, B. Faybishenko	<u>Inverse modeling of a multistep outflow experiments for determining hysteretic hydraulic properties</u>
Webb, S. W., C. K. Ho	<u>Review of enhanced vapor diffusion in porous media</u>
Oldenburg, C. M., G. J. Moridis	<u>Ferrofluid flow for TOUGH2</u>
Webb, S. W.	<u>Gas-phase diffusion in porous media: Comparison of models</u>
Schreiber, W., J. Kuo	<u>A computational study of some possible factors associated with melt eruption events</u>
Finsterle, S., C. Satik, M. Guerrero	<u>Analysis of boiling experiments using inverse modeling</u>
Webb, S. W., C. K. Ho	<u>Pore-scale modeling using TOUGH2</u>

Simulation Methods	
Schreiber, W.	<u>The use of an adaptive grid with TOUGH2 to track a moving phase front</u>
Moridis, G. J.	<u>TOUGH90: A FROTRAN90 implementation of TOUGH2</u>
Pruess, K., C. Oldenburg, G. Moridis	<u>Overview of TOUGH2, Version 2.0</u>
